Profile Summary

Artificial Intelligence and Data Science student skilled in MERN stack development and deep learning. Experienced in building secure REST APIs, authentication systems, and CNN-based computer vision models. Strong foundation in data structures and problem solving.

Education

Kongu Engineering College - Erode , Tamilnadu

B.Tech | Artificial Intelligence & Data Science | 2023 - 2027 | CGPA : 7.81

Vidhya Vikashni Mat. Hr. Sec. School - Tiruppur, Tamilnadu

Computer Science | 2021 - 2023 | HSC : 89.66 %

Projects

HelmetGuard AI - Helmet Detection System

An intelligent computer vision system that detects whether two-wheeler riders are wearing helmets using machine learning-based object detection. Processes real-time video or images to identify violations and improves road safety through automated monitoring and accuracy evaluation.

Blood Haven - Web Based Blood Donation System

Built BloodHaven, a MERN-based Blood Bank Management System with smart donor matching, emergency prioritization, location-based search, notifications, and a live deployed dashboard.

LearnSphere - E Learning Platform

Developed full-stack MERN application for online course management and enrollment. Implemented JWT authentication with role-based access (Student/Admin). Designed RESTful APIs with MongoDB schema and progress tracking system

Skills

Programming: Java, Python, C

Database: MongoDB, MySQL

Frontend: React.js, HTML, CSS

AI/ML: CNN, TensorFlow, Keras, OpenCV

Backend: Node.js, Express.js

Tools: Git, VS Code, Jupyter

Area of interest

- Full-Stack Web Development
- Machine Learning
- Computer Vision

Certifications

- MongoDB Certified Developer Associate - MongoDB
- Oracle Certified Professional Java SE 17 Developer - Oracle
